## **PROFILE**

Analytical, Ambitious, and Organized individual familiar with various programming languages and proficient in Machine learning and Deep learning. Effective communication skills, with high experience in teamwork.

## **HIGHLIGHTS OF QUALIFICATIONS**

- Currently enrolled in the Software Engineering Technology- AI Advanced Diploma program at Centennial College
- Proficient in HTML, JavaScript, React.js, Node.js, C#, SQL, NOSQL, kotlin, Python, NLP, Machine Learning, Project Management, Deep Learning.
- Experienced in both AI integrated or regular web development, android application development, and different kinds of software application development for academic projects
- Detail-oriented, flexible, energetic individual with critical thinking skills
- Multilingual in English, Hindi, and Nepali; with effective communication skills to support clients and customers and provide technical support to coworkers

## **ACADEMIC PROJECTS**

- **Weather Forecast**  
In my third semester of Software Engineering, I developed a website for weather forecasting using javascript. This website enables users to input the name of a city. Upon entering the city's name, the website displays the respective weather in degrees Celsius.
- **FIFA Tournament**  
As a group project, we designed a full stack website for FIFA, where users could access updates on teams and players for all games applying angular.js, javascript, and node.js. The website provides details about upcoming matches, as well as scores from previous matches and knockout stages.
- **Navigation Application**  
I designed and implemented an Android application, utilizing Kotlin, to facilitate the navigation of popular hangout places in Toronto for newcomers or tourists.
